Learn about Passive House Design and Construction in Victoria, BC

In August 2016 the BC Government announced its Climate Leadership Plan to achieve 2050 GHG emissions targets. The plan outlines policies being implemented to accelerate the development of net zero buildings, highlighting the international Passive House Standard, which enables the design and construction of high performance buildings.

If you are interested in learning more about Passive House design and construction, don't miss out on the upcoming courses in Victoria, BC in early 2017.

Introduction to Passive House Design and Construction

January 27, 2017
